WHO - GMP

QUALITY

Know about WHO-GMP Certification

Good manufacturing practice (GMP) is part of a quality system covering the manufacture and testing of active pharmaceutical ingredients, diagnostics, foods, pharmaceutical products and medical devices. GMP Certification confirms the products identity, composition, quality, purity and strength which they represent in the market. Under it, there is a set of guidelines that offer a system of procedures and documentation by which the confirmation of the products are given.

Benefits from GMP /WHO GMP

Reduced duplication of inspections

Enhanced market access

Export facilitation

Cost savings
